

Malcolm J. D'Souza Ph.D.

Professor of Chemistry | Associate Dean of
Interdisciplinary/Collaborative Sponsored Research
Wesley College

Malcolm J. D'Souza is Professor of Chemistry and Associate Dean of Interdisciplinary/Collaborative Sponsored Research at Wesley College in Dover, Delaware. He is the Principal Investigator on the Wesley College NIH-NIGMS DE-INBRE program, the NSF DE-EPSCoR program, the NSF ARRA program, and the Cannon Scholar (NSF S-STEM) program.

In 2009, the College of Liberal Arts and Sciences at Northern Illinois University (NIU) recognized Dr. D'Souza as one of its 50 most distinguished alumni. He received the American Chemical Society's E. Emmett Reid Award in 2012, recognizing his high-quality teaching in chemistry at a small college in the ACS Mid-Atlantic region. He was also honored twice in 2016, with the Delaware Bioscience Association's Higher Education Educator of the Year Award, and the National Institutes of Health's Sidney McNairy (IDeA program) Mentoring Award.

In addition to his research in physical organic chemistry, Dr. D'Souza has projects, presentations, and publications in the area of chemometrics, STEM-education, obesity studies, and in the design of commercial databases. You may reach Dr. D'Souza at malcolm.dsouza@wesley.edu.
